

Question 1:

Are people informed, prior to vaccination, that adjuvants in vaccines are not clinically approved?

Question 2:

Are people informed, prior to vaccination, that many vaccines were tested against another vaccine in clinical trials and not against a placebo?

Question 3:

Are people informed, prior to vaccination, that clinical trials of the MMR-vaccine (Measles, Mumps and Rubella-vaccine) showed that many children had complaints of gastro-intestinal illness and upper respiratory illness after the MMR-vaccination?

Information for question 1:

Professor Exley told in April 2016 on the 4th International Symposium on Vaccines that he had found out, through conversations with the European Medicines Agency, the FDA in the US and the manufacturers of aluminum adjuvants, that there are no clinically approved adjuvants. See his presentation in which he tells this in the YouTube-video *'The toxicity of aluminium adjuvants'*:

<https://www.youtube.com/watch?v=zaExaqCv5vo>

Information for question 2:

Many vaccines were not tested against a placebo in clinical trials, but against another vaccine. That was apparent from a document of the U.S. Department of Health and Human Services that Del Bigtree and his team received after having asked several questions in the so-called *'HHS Notice'*. He explains that in detail in this YouTube video:

<https://www.youtube.com/watch?v=hnrv3nCd8>

At 27 minutes in the video, you can see that almost all vaccines in the tables were not tested against a placebo control group.

- See in this document, *'HHS Notice'* of 12 October 2017, the questions asked to HHS by Del Bigtree and his team:

<https://icandecide.org/wp-content/uploads/whitepapers/ICAN-HHS-Notice.pdf>

- See in this document, *'HHS Response'* of 18 January 2018, the answers from HHS to Del Bigtree and his team:

<https://icandecide.org/hhs/HHS-Response.pdf>

- See in this document, *'Reply'* of 31 December 2018, the reaction from Del Bigtree and his team to the HHS Response:

<https://icandecide.org/hhs/ICAN-Reply.pdf>

Information for question 3:

In clinical trials, it appeared that many children had complaints of gastro-intestinal illness and upper respiratory illness after having received the MMR-vaccine. Del Bigtree shows the results of the clinical trials of the MMR-vaccine in this YouTube-video:

<https://www.youtube.com/watch?v=Tw7SnvxZVVQ>

The results of the clinical trials of the MMR-vaccine were obtained through the Freedom of Information Act (= FOIA). You can find these results in this document:

<https://icandecide.org/government/FDA-Production-FOIA.pdf>

In the abovementioned video, Del Bigtree deals with table 10 from study 442, table 10 from study 443 and table 9 from study 459. All three tables can be found in the document.
