

# Got Titers?

If a lab test shows your child has positive antibody titers . . .

# They're good to go to school!

95% of children develop positive antibody titers after their first MMR dose. The second dose is not a booster -- it's for the 5% who didn't respond.

There's a space on the WA State Immunization Form to record lab-confirmed immunity for most vaccine-targeted infections!

**Documentation of Disease Immunity**  
*Healthcare provider use only*

If the child named in this CIS has a history of Varicella (Chickenpox) or can show immunity by blood test (titer) it MUST be verified by a healthcare provider

I certify that the child named on this CIS has:

- a verified history of Varicella (Chickenpox).
- laboratory evidence of immunity (titer) to disease(s) marked below. **Lab report(s) for titers MUST also be attached.**

<input type="checkbox"/> Diphtheria	<input type="checkbox"/> Mumps	<input type="checkbox"/> Other:
<input type="checkbox"/> Hepatitis A	<input type="checkbox"/> Polio	
<input type="checkbox"/> Hepatitis B	<input type="checkbox"/> Rubella	
<input type="checkbox"/> Hib	<input type="checkbox"/> Tetanus	
<input type="checkbox"/> Measles	<input type="checkbox"/> Varicella
